

## Armcor Air Solutions introduces a new dimension to its entire unit range.

**UV-C Germicidal Lights** – For an improved indoor air quality, peace of mind and ultimate protection for the personnel who work, play and live indoors.

The **UV-C Germicidal Lights** provide another unique advantage to our Australian Made product range. **UV-C Germicidal Lights** have long been recognised to kill virus and bacteria and remove airborne particle transmission.

When placed in the supply air stream of ventilation systems, these lights help in the elimination of harmful particles. This helps increase air quality and improve the energy efficiency of units. UV-C lights are simple, safe, economical, and easy to maintain. The lights help in keeping the cooling coils and drain pans free from bacteria, virus, and dirt particles.

- **UV-C Germicidal Lights** installed in the Supply Air Chamber
- Aluminium Frame Lamp Holder with Convex Reflector
- Safety Fan Door Switch
- Warning Labels on Unit
- Electrical Wiring for Lights Included

The **UV-C Germicidal Lights** are suitable for the XEM, XEP and XES units.

CODES	L/Sec	NO. OF UV-C LIGHTS	LENGTH
70-0001	500	1	625mm
	900	1	
70-0002	1200	1	925mm
	1500	1	
	1700	1	
70-0003	2000	2	1148mm
	2500	2	
	3000	2	
	3500	2	
	4000	3	
70-0004	4500	3	1148mm
	5000	3	
	6000	4	
70-0005	6000	4	

To assist in the design of your next project, Armcor [Sales & Engineering Team](#) can help determine the correct sizing, selection, and specifications required.
